

Servicing the Fountain

Over time the fountain can be clogged with foreign debris. To service the fountain, lift the fountain off of the flower pad, remove the fountain head and flip the fountain upside down. Next remove the water pump (do not disconnect the wire). Take out the rotor with the included tweezers and the filter cotton and clean all exposed parts using warm soapy water. Reassemble the fountain. See drawing below:

Keeping your Bird Oasis Clean

Eventually algae can grow in your bird bath. Preventive measures can greatly reduce the amount of algae and how often your bath needs to be cleaned. Lightscapes has an algae inhibitor available. Simply call us or visit our website to order. When you do need to clean your Bird Oasis, first use vinegar or bleach to GENTLY wash the floating flower pad and fountain. Just gently spray the flowers to clean them. After cleaning the fountain and floating flower pad, dump the old water from the barrel, clean with vinegar or bleach and then wash with soapy water, rinse with water and refill the tub with fresh water.

Bird Oasis™

By Lightscapes LLC

Patent Pending

Built In The USA!

Please read instructions before assembling.

Assembly of your Lightscapes **Bird Oasis™ Bird Bath**

Model No. 104-0001

Tools Needed: None

Parts in the Packaging: 11.9 Gallon Barrel, Solar Powered Fountain, 4 Fountain Clips, 7 Fountain Heads, 1 Fountain Head Base, Floating Flower Pad with Bath Tub.

Step One: Take items out of box and make sure all parts are included.

Step Two: Place your Bird Oasis™ barrel where you plan on leaving it. Make sure the surface is flat and level and has maximum exposure to sunlight.

Step Three: Fill the barrel to one-half inch below the rim, with clean water.

Step Four: Choose the fountain head you want to use and push the bottom onto the center hub of the fountain base. **Note:** see next page for fountain head types.

Step Five: Install four fountain clips onto the fountain (see photo A. below).

Step Six: Place the floating flower pad into the water.

Step Six: Place assembled fountain onto floating flower pad. NOTE the fountain clips rest on top of the flower pad (see photo B. below).

Step Eight: ENJOY!

Choosing The Fountain Head

The Fountain comes with seven different heads that will create different water patterns. They are easily installed and changed to suit your preference.

Fountain heads B1, B2, B3, and B4 install directly onto the fountain. Fountain heads B5, B6 and B7 install on fountain head base B8 and the assembly installs onto the fountain by pushing it onto the center hub on the base. If you live in a windy area, Lightscapes recommends using fountain head B1 or B3.

Spray Pattern By Fountain Head
